

FLUID WASHER FOR A SPRAY BOOTH

ABSTRACT OF THE DISCLOSURE

A water washer for a spray booth includes a gas exhaust duct, an exhaust fan and a fluid pump. The duct includes an entrance and an exit, with the entrance of the duct including a plurality of apertures. The entrance of the duct is positioned to receive a gas mixed with a spray from a spray application area of a spray booth. The exhaust fan is positioned to draw the gas from the spray application area into the gas exhaust duct. The fluid pump is coupled to a source of fluid and a fluid supply pipe, which is positioned to direct a fluid into the plurality of apertures at the entrance of the enclosure and thereby remove overspray from the gas drawn from the spray application area.
